

U.S. Bureau of Economic Analysis

Transfer receipts. Transfer receipts decreased \$1.3 trillion for the nation in the third quarter of 2020, after increasing \$2.4 trillion in the second quarter. The decrease in transfer receipts reflected decreases in state unemployment insurance compensation, and all other transfer receipts (chart 2). Transfer receipts decreased in every state and the District of Columbia, ranging from \$2.1 billion in the District of Columbia to \$122.4 billion in California (table 2).

U.S. Bureau of Economic Analysis

The decrease in state unemployment compensation reflected a partial rebound in employment as workers returned to their jobs following the economic shutdown due to the COVID-19 pandemic, as well as the expiration of the temporary \$600 increase in weekly federal government benefits provided by the CARES act. The decrease in all other transfers reflected a decrease in the number of \$1,200 economic impact payments paid to individuals that started in the second quarter.

Coronavirus (COVID-19) Impact on the Third-Quarter 2020 State Personal Income

The 2020 Q3 estimates of state personal income were impacted by the response to the spread of COVID-19. Federal economic recovery payments slowed as pandemic-related assistance programs continued to wind down. The full economic effects of the COVID-19 pandemic cannot be quantified in the state personal income estimates because the impacts are generally embedded in source data and cannot be separately identified. For more information, see [Effects of Selected Federal Pandemic Response Programs on Personal Income by State](#).

Property income. Property income decreased 4.0 percent for the nation in the third quarter of 2020, after decreasing 8.2 percent in the second quarter. Property income decreased in every state, ranging from -5.7 percent in Arkansas to -1.7 percent in Hawaii.

Earnings. For the nation, earnings increased 32.8 percent in the third quarter of 2020, after decreasing 25.8 percent in the second quarter (table 2). The increases reflected the gradual reopening of businesses following the partial economic shutdown due to the COVID-19 pandemic.

Earnings increased in 23 of the 24 industries for which BEA prepares quarterly estimates (table 4). Healthcare and social assistance, accommodations and food services, and retail trade were the leading contributors to the overall earnings increase. The percent change in earnings across all states ranged from 11.5 percent in Oklahoma to 55.3 percent in Nevada.

Personal Income by State, 4th Quarter and Year 2020 (Preliminary)

Additional Information

Resources

- Information on COVID-19 and recovery impacts is available on our [web site](#).
- Stay informed about BEA developments by reading [The BEA Wire](#), signing up for BEA's [email subscription service](#), or following BEA on Twitter [@BEA News](#).
- Historical time series for these estimates can be accessed in BEA's [Interactive Data Application](#).
- Access BEA data by registering for BEA's Data [Application Programming Interface](#).
- For more on BEA's statistics, see our monthly online journal, the [Survey of Current Business](#).
- BEA's [news release schedule](#).
- BEA Regional Facts ([BEARFACTS](#)): a narrative summary of personal income, per capita personal income, components of income, and gross domestic product for counties, metropolitan statistical areas, and states.
- Complete information on the sources and methods for the estimation of [BEA's State Personal Income and Employment](#).

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Per capita personal income is calculated as the total personal income of the residents of a state divided by the population of the state. In computing per capita personal income, BEA uses midquarter population estimates based on unpublished Census Bureau data.

Earnings:

Earnings by place of work is the sum of wages and salaries, supplements to wages and salaries, and proprietors' income. BEA's industry estimates are presented on an earnings by place of work basis.

Net earnings by place of residence is earnings by place of work less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. BEA presents net earnings on an all industry level.

Property income is rental income of persons, personal dividend income, and personal interest income.

Personal current transfer receipts are benefits received by persons from federal, state, and local governments and from businesses for which no current services are performed. They include retirement and disability insurance benefits (mainly Social Security), medical benefits (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance compensation, veterans' benefits, and federal education and training assistance.

Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income for the United States is the sum of the state estimates and the estimate for the District of Columbia; it differs slightly from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Statistical conventions

Quarter-to-quarter percent changes are calculated from unrounded data and are annualized. Annualized growth rates show the rate of change that would have occurred had the pattern been repeated over four quarters (one year). Annualized rates of change can be calculated as follows: $((\text{level of later quarter} / \text{level of earlier quarter})^4 - 1) * 100$. Quarterly estimates are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates.

BEA Regions

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of presentation and analysis:

New England (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont)

Mideast (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania)

Great Lakes (Illinois, Indiana, Michigan, Ohio, and Wisconsin)

Plains (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota)

Southeast (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia)

Southwest (Arizona, New Mexico, Oklahoma, and Texas)

Rocky Mountain (Colorado, Idaho, Montana, Utah, and Wyoming)

Far West (Alaska, California, Hawaii, Nevada, Oregon, and Washington)

Uses of State Personal Income Statistics

State personal income statistics provide a framework for analyzing current economic conditions in each state and can serve as a basis for decision making. For example:

- Federal government agencies use the statistics as a basis for allocating funds and determining matching grants to states. The statistics are also used in forecasting models to project energy and water use.
- State governments use the statistics to project tax revenues and the need for public services.
- Academic regional economists use the statistics for applied research.
- Businesses, trade associations, and labor organizations use the statistics for market research.

1. Percent changes are expressed at annual rates.

2. Net earnings is earnings by place of work—the sum of wages and salaries, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.
