

News Release

EMBARGOED UNTIL RELEASE AT 8:30 a.m. EST, Thursday, November 14, 2024

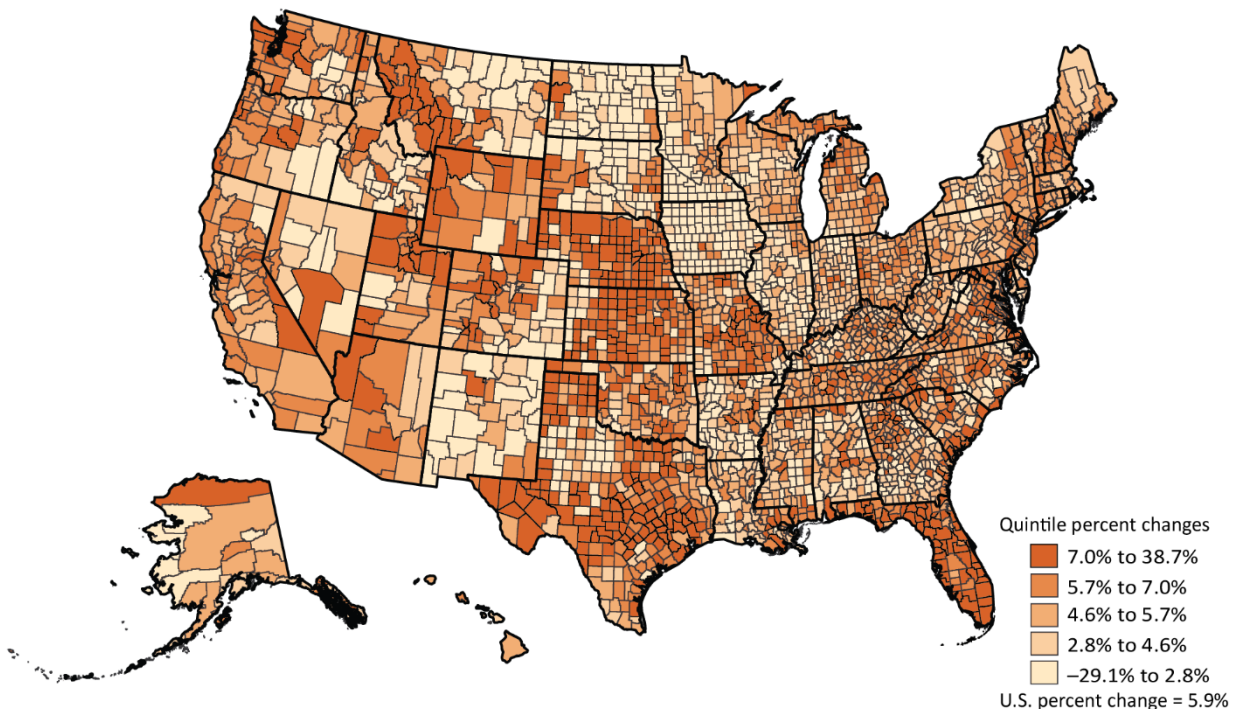

BEA 24-51

Technical:	Paul Medzerian	301-278-9264	REIS@bea.gov
Media:	Connie O'Connell	301-278-9003	Connie O'Connell@bea.gov

Personal Income by County and Metropolitan Area, 2023

Personal income, in current dollars, increased in 2,814 counties, decreased in 295, and was unchanged in five counties in 2023, according to statistics released today by the U.S. Bureau of Economic Analysis. Personal income increased 6.0 percent in the metropolitan portion of the United States and 4.7 percent in the nonmetropolitan portion (table A). In metropolitan counties, the percent change in personal income ranged from 17.3 percent in Oldham County, TX, to -8.6 percent in Oliver County, ND. In nonmetropolitan counties, it ranged from 38.7 percent in Sherman County, TX, to -29.1 percent in Sheridan County, ND ([BEA interactive data](#)).

Personal Income: Percent Change for Counties, 2022-2023

Per capita personal income. In the metropolitan portion of the United States, per capita personal income—personal income divided by population—increased 5.5 percent in 2023, up from 2.8 percent in 2022. In the nonmetropolitan portion of the United States, per capita personal income increased 4.4 percent, up from 2.6 percent. Table 1 presents estimates of per capita personal income by state and county.

Table A. Personal Income, Per Capita Personal Income, and Population Percent Change

	Personal income		Per capita personal income		Population	
	2022	2023	2022	2023	2022	2023
United States	3.1	5.9	2.8	5.4	0.4	0.5
Metropolitan portion	3.2	6.0	2.8	5.5	0.4	0.5
Nonmetropolitan portion	2.7	4.7	2.6	4.4	0.1	0.2

U.S. Bureau of Economic Analysis

The county personal income estimates released today provide more geographic detail on the nation’s personal income for 2023. National estimates of personal income for 2023 were first released in February 2024, followed by preliminary state personal income estimates in March. The estimates released today provide the first glimpse of personal income for 2023 in counties and metropolitan statistical areas. Real personal income for states, metropolitan areas, and state metropolitan and nonmetropolitan portions of the United States will be released on December 12, 2024.

Update of county and metropolitan area statistics

The estimates for 2023 incorporate the results of BEA’s annual update of personal income by county and metropolitan area that was also released today. The annual estimates of personal income by county and metropolitan area from 2019 to 2022 were revised. This update incorporates new and revised source data that are more complete and more detailed than previously available, the results of the September 26, 2024, annual update of the National Income and Product Accounts, and the results of the September 27, 2024, annual update of state personal income. Our online journal, the *Survey of Current Business*, will publish an article in 2025 describing the results.

BEA released new estimates of per capita personal income for 2023. BEA used U.S. Census Bureau population figures to calculate per capita personal income estimates for 2020 through 2023. For earlier estimates, BEA used intercensal population statistics that it developed based on Census Bureau methodology. See [“Note on Per Capita Personal Income and Population.”](#)

Starting on December 3, 2025, BEA will begin to regularly publish gross domestic product and personal income by county and metropolitan area together in a single news release, providing a fuller picture of the economies of all counties and metropolitan areas. The combined news release will replace the publication of two separate releases issued on different days.

Next release: December 3, 2025, at 8:30 a.m. EST

Gross Domestic Product by County and Metropolitan Area and Personal Income by County and
Metropolitan Area, 2024

Note: Regional Economic Accounts news releases will no longer include a separate “Release Highlights” document as part of the releases’ “Related Materials.” Information previously included in Highlights will continue to be available in the news releases and on BEA’s website.

Additional Information

Resources

- Stay informed about BEA developments by reading [The BEA Wire](#), signing up for BEA's [email subscription service](#), or following [@BEA_News](#) on X.
- Historical time series for these estimates can be accessed in BEA's [Interactive Data Application](#).
- Access BEA data by registering for BEA's [Data Application Programming Interface](#).
- For more on BEA's statistics, see our online journal, the [Survey of Current Business](#).
- For upcoming economic indicators, see BEA's [news release schedule](#).
- BEA Regional Facts ([BEARFACTS](#)) is a narrative summary of personal income, per capita personal income, components of income, and gross domestic product for counties, metropolitan statistical areas, and states.
- For complete information on the sources and methods used to estimate personal income by local area, see BEA's [local area personal income and employment](#) methodology.

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

County personal income differs slightly from the estimate of U.S. personal income in the National Income and Product Accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In BEA's state statistics, estimates of personal income for the United States is the sum of the state estimates and the estimate for the District of Columbia.

Per capita personal income is calculated as the total personal income of the residents of a given area divided by the population of the area. In computing per capita personal income, BEA uses U.S. Census Bureau midyear population estimates.

Uses of local area personal income statistics

Local area personal income statistics provide a framework for analyzing current economic conditions in local economies and can serve as a basis for decision-making. For example:

- Federal government agencies use the statistics in forecasting models to project energy and water use. The statistics are also used as a basis for allocating funds and determining matching grants to states.
- State governments use the statistics to project tax revenues and the need for public services.
- Academic regional economists use the statistics for applied research.
- Businesses, trade associations, and labor organizations use the statistics for market research.

1. Per capita personal income was computed using U.S. Census Bureau midyear population estimates for 2021 through 2023, released in March 2024.

2. Virginia combination areas consist of 1 or 2 independent cities with populations of less than 100,000 combined with an adjacent county. The county name appears first, followed by the city name(s). Separate estimates for the jurisdictions making up the combination areas are not available.

U.S. Bureau of Economic Analysis
