

## Personal Consumption Expenditures by State, 2016

State personal consumption expenditures (PCE) grew on average 4.0 percent in 2016, the same rate as in 2015. In 2016, PCE growth ranged from 0.2 percent in North Dakota to 6.2 percent in Utah.

U.S. Bureau of Economic Analysis

- Growth in housing and utilities and in health care were the leading contributors to PCE growth nationally as well as in most states.
- Gasoline and other energy goods was the only category that subtracted from national PCE growth, declining on average 10.3 percent. Spending on gasoline and other energy goods declined in every state.
- Across all states and the District of Columbia, per capita PCE in 2016 was \$39,664. It ranged from a high of \$51,981 in Massachusetts to a low of \$30,200 in Mississippi.

BEA statistics— including GDP, personal income, the balance of payments, foreign direct investment, the input-output accounts, and economic data for states, local areas, and industries —are available at [www.bea.gov](http://www.bea.gov). [E-mail alerts](#) are also available.

NOTE: Personal consumption expenditures by state for 2017 are scheduled to be released on October 4, 2018.
