## NOTICE

### **Revisions to Goods and Services and Comprehensive Restructuring of the International Economic Accounts**

In this release and in the accompanying “U.S. International Trade in Goods and Services: April 2014” release, the U.S. Bureau of Economic Analysis (BEA) and the U.S. Census Bureau are publishing revised statistics on both U.S. trade in goods and U.S. trade in services for January 1999 to March 2014. The revised statistics will also be included in the report “U.S. International Transactions: First Quarter 2014 and Annual Revisions” and in the international transactions interactive database on BEA’s Web site, both to be released by BEA on June 18, 2014.

This annual revision has not changed the overall trend in the goods and services balance. On an annual basis for 1999–2013, the goods and services deficit was revised less than 2 percent for all years; for most years, the revisions were less than 1 percent. The goods deficit was revised downward for all years except for 2012. For most years, the services surplus was also revised downward.

#### ***Goods and Services***

With the annual revision of the [U.S. International Transactions Accounts](#) (ITAs), BEA will also introduce new table presentations, including a new presentation of services, as part of a comprehensive restructuring of BEA’s international economic accounts. This change in presentation, combined with changes in definitions and classifications, enhances the quality and usefulness of the accounts for data users and brings the statistics into closer alignment with international guidelines. [Table templates](#) of the new presentation are available on BEA’s Web site. Additional information was presented in the March 2014 *Survey of Current Business* article, “[The Comprehensive Restructuring of the International Economic Accounts: Changes in Definitions, Classifications, and Presentations](#).” Changes that impact the “U.S. International Trade in Goods and Services” release are discussed below. These changes do not impact the balance on goods and services.

Beginning with statistics for 1999, net exports of goods under merchanting, which were previously included in exports of services under *other private services*, have been reclassified to exports of goods on a balance of payments (BOP) basis. These net exports reflect the net value of goods that are purchased and subsequently sold abroad without entering the United States. Because these goods do not cross the U.S. customs frontier, their value is not recorded in the data for goods on a Census basis. This reclassification was made through a new BOP adjustment. BOP adjustments, which are adjustments that BEA applies to goods on a Census basis to convert them to a BOP basis, are combined and presented as *net adjustments* in this release.

Beginning with statistics for 1999, the services categories shown in Exhibits 3 and 4 have changed, and the number of categories has increased from seven to nine. The new categories are: *maintenance and repair services n.i.e.* (not included elsewhere); *transport; travel (for all purposes including education)*; *insurance services; financial services; charges for the use of intellectual property n.i.e.; telecommunications, computer, and information services; other business services; and government goods and services n.i.e.*

The category *other transportation* is renamed *transport* and now includes *passenger fares*, which is no longer shown as a separate category in the trade release. However, a monthly series for *passenger fares* is available on BEA’s Web site at [www.bea.gov/newsreleases/international/trade/trad\\_time\\_series.xls](http://www.bea.gov/newsreleases/international/trade/trad_time_series.xls). The definition of travel is broadened to include health-related and education-related travel and the expenditures on goods and services by border, seasonal, and other short-term workers, all of which were previously included in *other private services*. To distinguish it from the old measure, the new measure is named *travel (for all purposes including education)*. As with *passenger fares*, a monthly series for the old definition of *travel* is available on BEA’s Web site in the file referenced above. *Royalties and license fees* is renamed *charges for the use of intellectual property n.i.e.* *Transfers under U.S. military agency sales contracts* (for exports), *direct defense expenditures* (for imports), and *U.S. government miscellaneous services* (for exports and imports) are now part of *government goods and services n.i.e.* *Maintenance and repair services n.i.e., financial services, and insurance services*, all of which were

previously included in *other private services*, are now shown as separate categories. *Other business services* consists of the remaining components of *other private services*.

### ***Goods***

Exports and imports of goods on a Census basis for 2011–2013 were revised to apply corrections and adjustments to previously published not seasonally adjusted statistics. Statistics for 2013 were also revised to redistribute monthly data that arrived too late for inclusion in the month of transaction and were initially included in the month in which the data were received. Seasonal and trading-day adjustments were then recalculated, and the seasonally adjusted current-dollar series were revised beginning with statistics for 2011.

In addition to revised statistics on goods on a Census basis and to the new BOP adjustment for net exports of goods under merchanting described above, exports and imports of goods on a BOP basis were revised to incorporate newly available and revised source data on other BOP adjustments beginning with 2009.

### ***Services***

In addition to the new categories described above, exports and imports of services were revised beginning with statistics for 1999 to incorporate 1) an improved estimation methodology for travel, 2) revised source data on the number of U.S. residents traveling abroad that resulted in revisions to *travel (for all purposes including education)* exports and imports and to *transport* imports, which include passenger fares, 3) revised seasonal adjustments, and 4) revised interpolations of quarterly source data to monthly statistics (see the information section on page A-4 of the “U.S. International Trade in Goods and Services: April 2014” release). Statistics beginning with 2011 were also revised to incorporate newly available and revised source data, primarily from BEA’s surveys of international services transactions.

### **Seasonally Adjusted Countries and Areas for Goods and Services**

Beginning with this release, the “U.S. International Trade in Goods and Services: Annual Revision” report includes a new exhibit (Exhibit 19) that presents quarterly seasonally adjusted trade in goods and services on a balance of payments basis for selected major trading partner countries and areas. In the accompanying “U.S. International Trade in Goods and Services: April 2014” release, data for the fourth quarter of 2012 to the first quarter of 2014 are presented in Exhibit 20. Historical data beginning with 1999 and a list of frequently asked questions are available at [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm). With the release of the ITAs on June 18, 2014, data for goods will be presented in new ITA table 2.2, and data for services will be presented in new ITA table 3.2.

If you have questions or need additional information, please contact BEA’s Balance of Payments Division at [InternationalAccounts@bea.gov](mailto:InternationalAccounts@bea.gov).

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy-related petroleum products as those aggregated in the Standard International Trade Classification (SITC). The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene, which are included in "Manufactured Goods" in the SITC.
