

Overflow Sheet for Schedule A- U.S. Airline Operator's Revenues

On Schedule A below, report the U.S. airline operator's revenues from carriage of export freight and express by country of destination. Report all countries where the transactions occurred.

In column 1, write or select the country of the freight/express' destination (i.e. where the U.S. airline operator unloads the freight).

In column 2, report total revenue derived from the country selected in column 1 from common and contract carriage of export freight and express originating from inside the United States and destined to points outside the United States. Include revenues from charter contracts.

In column 3, report total revenue derived from the country selected in column 1 from common and contract carriage of freight and express originating from, and destined to, points outside the United States.

IMPORTANT – Report amounts in thousands of U.S. dollars (omitting 000). Round amounts of less than \$500 to 0. Do not enter amounts in the shaded portion of each item.

Schedule A- Export Freight and Express Revenues						
	BEA USE ONLY	Country of destination (1)	From inside the U.S. to points outside the U.S. (2)		From outside the U.S. to points outside the U.S. (3)
